LIMITED WARRANTY

REV.EN20230715-LINEAR-BIFACIAL MODULE

P_{1st year}, %

P_{1st year}, % represents the average power output of the solar module under standard test conditions (STC) during the first year of the warranty period. The power output is measured in Watts (W) and is expressed as a percentage of the nominal power output (P₁) of the solar module. The formula for calculating the average power output is as follows:

P_{N year}, %

P_{N year}, % represents the average power output of the solar module under standard test conditions (STC) during the Nth year of the warranty period. The power output is measured in Watts (W) and is expressed as a percentage of the nominal power output (P_N) of the solar module. The formula for calculating the average power output is as follows:

$$P_{N\text{ year}} = P_1 \times (1 - \text{Degradation Rate})^{N-1}$$

With N, 2 N Limited Power Warranty Period

1.2 Limited Product Warranty

The solar module is warranted to be free from defects in materials and workmanship under normal operating conditions. The warranty covers the solar module for a period of 10 years from the date of shipment. The warranty is limited to the replacement of the solar module or a portion thereof if it is found to be defective. The warranty does not cover damage caused by fire, theft, vandalism, or other external factors. The warranty is void if the solar module is used in an application not intended by the manufacturer.

1.3 Limited Power Warranty

The solar module is warranted to maintain a minimum power output of 80% of its nominal power output (P₁) over a period of 25 years. The power output is measured in Watts (W) and is expressed as a percentage of the nominal power output (P₁) of the solar module. The warranty is limited to the replacement of the solar module or a portion thereof if it is found to be defective. The warranty does not cover damage caused by fire, theft, vandalism, or other external factors. The warranty is void if the solar module is used in an application not intended by the manufacturer.

2. Warranty Claim and Remedies

2.1 Warranty Claim

A claim for warranty coverage must be filed with the manufacturer within 30 days of the discovery of the defect. The claim must be supported by a written report from a qualified professional, such as a solar installer or a certified technician, who has inspected the solar module and determined that it is defective. The manufacturer will investigate the claim and, if it is found to be valid, will provide a replacement solar module or a portion thereof, at its discretion. The manufacturer is not responsible for any costs associated with the transportation, handling, or installation of the replacement solar module. The warranty is void if the solar module is used in an application not intended by the manufacturer.
